AN AGRIBRIEFING COMPANY

Urner Barry is a leading source for price reporting in the pork sector. We are continuously soliciting feedback from stakeholders to ensure that our coverage reflects current trading conditions and practices. On November 4, 2022, Urner Barry proposed changes to its pork market coverage and sought industry feedback on those proposed changes. The comment period has now closed. To improve market transparency and provide stakeholders with meaningful information, Urner Barry will make the following improvements to its pork market coverage:

The following is a list of quotes to be **ADDED** to the UB Pork Report. These items are regularly tracked by the industry and consistently trade with the volume necessary to produce a reliable quotation.

<i>Item</i>	<i>Reason</i>
UB Pork Ribs - Loin Back Ribs 2.00/up 1 PC VAC, Frozen	The frozen counterpart to CC 269. A popular form for heavy back ribs with plenty of weekly volume. Aligns with USDA CC 11636
UB Pork Loin - 1/4 Trimmed Loin Combo	Common form of 1/4" loins with consistent volume. We currently only quote boxed loins. Aligns with USDA CC 11608.

The following is a list of quotes to be **REMOVED** from the UB Pork Report. These items have long histories of exceedingly light or non-existent spot market activity and thus producing an accurate and robust quotation is often difficult or impossible.
